Fashion Palette Swatch -These hot colors were chosen to compliment today's fashion trends. Our goal is to always stay current with this selection. As fashions change so may this palette. Same great feel and quality as all the Chaparral leathers.

Urban Leather Swatch - A lightly distressed selection leathers with the emotion of the city. Mottled colors with an extra soft feel that remind us of the runways most fashionable designers.

NOTE: Our Urban leather is a top grain leather that is dyed for color without any pigments applied. These hides will exhibit natural characteristics such as healed scars, scratches, neck and belly wrinkles. Expect color variation from the swatch to the actual leather, due to the fact leather is a natural product and will absorb dye differently within the hide and from hide to hide. These leathers will fade with prolonged exposure to sunlight.

THE URBANS...

*contemporary very soft leathers
mottled colors with a distressed feel
and an UPTOWN look!*
